VOUCHER TABLE. List of samples included in the *Tolpis* cpDNA restriction site study, with collection information and voucher information. Sample identification refers to the identifier used for each sample in Fig. 2. Samples excluded from the parsimony analyses are indicated with an asterisk (*). Collection locality is given in the following order for the island species: island group, island collected on, and specific locality. The island groups are abbreviated as follows: AZ = Azores; CI = Canary Islands; CV = Cape Verde Islands; and MA = Madeira Islands. The institution abbreviations are as follows: COI = University of Coimbra, Coimbra, Portugal; GOET = Gottingen-Botanischer Garten, Systematisch-Geobotanisches, Universitat Gottingen, Gottingen, Germany; MADJ = Jardim Botânico da Madeira, Funchal, Madeira, Portugal; and ORT = Jardín de Aclimatación de la Orotava, Tenerife, Canary Islands, Spain.
